Abstract

Many personal computer users as well as those who must support PC users must deal with multiple operating systems. This poster, along with the handout, serves as a single reference for looking up how to complete a task in a particular operating system. This poster illustrates how to perform some basic functions when using the various Microsoft operating systems. The name of the function, such as "deleting a file", is listed, and the procedure for completing the function described for each of the operating systems. The poster serves as a reference and a copy of the poster is included with a handout that will be given to each visitor to the poster site. The handout gives details for the procedures outlined by the reference poster.

The poster and handout contents are available over the web at http://coe.tsuniv.edu.
